

# Stephanie Coates

Software Engineer

## ABOUT

I'm an experienced developer focused on building beautiful, high-quality digital experiences. With a unique background in journalism and wilderness therapy guiding, my skillset is rooted in my love of research and learning, strong communication skills, and desire to empower those around me. Since transitioning into tech, I've rapidly risen through the ranks, taking on senior-level responsibilities within the first year. To me, success is working in collaboration with other ambitious, passionate people toward a meaningful goal.

## EXPERIENCE

Software Engineer | American Express | Phoenix, AZ | 3/2019 - Present

- Translated requirements from product and design into modern interfaces for both internet and intranet applications using latest React practices
- Helped optimize and open source One App, Amex's custom frontend framework
- Saved the company money by overhauling the Nginx config on Amex's critical static asset servers. Regulated CORS permissions, set headers to cache assets on the CDN, added developer tooling, then gave a companywide presentation on the effort
- Drove initiatives for better onboarding, friendlier documentation, full test coverage across all repos, and more diverse hiring pipelines within the organization
- Promoted from junior to mid-level engineer within first 8 months on the Enterprise Architecture team after continuously seeking out new opportunities to grow and provide value

Developer Intern | Yoodlize | Lehi, UT | 1/2019 - 2/2019

- Built features for a peer-to-peer rental mobile app using React Native and GraphQL

## EDUCATION

DevMountain — Web Development Bootcamp, 2019

Sierra Nevada College — B.A. Interdisciplinary Studies: Journalism & Outdoor Adventure Leadership, 2017
