SKILLS

Javascript

Git

React.js

React Native

Redux

GraphQL

HTML5

CSS3

Node.js

Express.js

PostgreSQL

Twilio

Socket.io

Nginx

Jest

Gatsby

EXPERIENCE

Software Engineer III

American Express | Phoenix, Arizona | 03/2019 - present

- Built an internal application to visualize real-time availability, latency, and other metrics collected by a distributed tracing system monitoring americanexpress.com APIs
- Constructed schemas and resolvers for Amex's Node.js GraphQL server and contributed to discussions about data architecture
- Contributed to, reviewed, and released Amex's inner-source framework on a weekly basis using Jenkins CICD pipeline
- Refactored and reconfigured Amex's Nginx servers (these servers are the origins to Amex's CDN and power most of the website's static assets). Without these servers functioning correctly, American Express sites wouldn't be able to operate
- Wrote over 5,000 tests using Jest to validate expected behavior of the Nginx server configuration files
- Collaborated as part of an agile scrum team

Developer Intern

Yoodlize, Inc. | Provo, Utah | 01/2019 - 02/2019

- Built features for the iOS and Android mobile application for Yoodlize, a peer-to-peer rental platform, using React Native, GraphQL, Expo and Xcode
- Navigated and contributed to an existing codebase, wrote clean code for a production-level app, wrote and ran Jest tests, and learned to collaborate with a development team

EDUCATION

13-week Intensive Web Development Bootcamp

DevMountain | Provo, Utah | devmountain.com | Graduated 01/2019

B.A. Interdisciplinary Studies: Journalism & Outdoor Adventure Leadership

Sierra Nevada College | Incline Village, Nevada | Graduated 05/2017
