# STEPHANIE COATES

## SOFTWARE ENGINEER

## ALL ABOUT ME

I'm curious and optimistic, a perpetual student and total soft-skill nerd. My biggest strengths are my ability to learn quickly and my never-ending desire to grow and improve. I'm looking for a diverse, collaborative, fun team where I'm challenged daily and can contribute high-quality work towards a meaningful goal.

## TECHNOLOGIES

| | |
|---|---|
| JavaScript | Redux |
| HTML & CSS | Node.js |
| Git | Gatsby |
| GraphQL | Jest |
| React.js | Nginx |

## WORK

### SOFTWARE ENGINEER
**American Express | March 2019 - Present**

- Collaborated with engineers, designers, and product managers to successfully build the UI for a brand new, customer-facing digital product to be released in 2021
- Refactored and reconfigured Amex's static asset Nginx servers for performance, reliability, and readability
- Regulated CORS permissions, optimized caching by the CDN and browser, enabled gzip compression, and implemented developer tooling for all Nginx servers
- Designed and built an internal application with React. and Node.js to visualize observability metrics for the company's microservices architecture
- Wrote thousands of Jest unit tests and maintained a standard of 100% test coverage for all shipped code

### DEVELOPER INTERN
**Yoodlize, Inc. | January 2019 - February 2019**

- Built features for the iOS and Android mobile application for Yoodlize, a peer-to-peer rental platform, using React Native, GraphQL, Expo and Xcode
